

Introduction

This phase of the Project Management Methodology establishes the conceptual view and general definition of a project. This starting point is essential in that it will allow those that will be delivering the product (SMEs, Users, and Stakeholders) to reach agreement on its concept and definition.

Task Breakouts

Participants

Business Project Manager (BPM), IT Project Manager (ITPM), Project Sponsor (or designee), Project Stakeholder(s), Requirements Manager, SMEs

The number of participants is determined by the project's complexity.
